“For every 5 minutes I spend with TeacherEase, I save 10 minutes somewhere else. Grades are automatically calculated. I get fewer calls from parents. Students are working harder.”

– 8th grade teacher

EASY FOR TEACHERS TO LEARN AND USE

Teachers save time with TeacherEase. They can manage student grades, assignments, tests and behavior logs anywhere on the web. There is no software to install or learn. Mundane tasks are automated and tools are made available to better understand how students are learning. Parents can easily see the academic performance of their students, motivating them to higher achievement.

PRODUCT DESCRIPTION

Web-based Gradebook. Teachers keep their gradebook on a secure web-site (assignments, scores, comments, behavior, attendance, etc). They save time preparing grades and updates. Web pages are user-friendly and easy to learn.

Share with Parents. Parents login and view their child's performance. They can praise an excellent student and identify a struggling one.

Improve Student Performance. When a parent or student checks grades on-line, student performance improves: grades increase 5-8% and missed work drops by 40%.

Flexible Grading. Pick categories, add weighting, and average grades automatically. Drop the lowest score.

Grading Scales. Standardize grading within a school, let teachers choose per class, or allow for Special Ed exceptions.

Graph Performance. Teachers generate histograms, trendlines, and pie charts to better understand how well students are learning.

Behavior Logs. Document student behavior, both good and poor. Recognize success, generate record of conduct.

Attendance. Track attendance in the classroom. Email parents when their student is absent.

Print. For parents without an Internet connection, print progress reports, incomplete homework, and more.

Web-based Service. Access it anywhere via the Internet. Grade at school or home without transferring data on disks.

Technology Coordinator. No software installation, hardware purchases, or maintenance required.
